PRESENTATION OUTLINE

Introduction

Objectives and Evaluation
Question

Methodology

Preliminary Results

Provisional Conclusion and Policy
Implications

Introduction

The **FishCORAL** is a project co-financed and implemented by IFAD, DA-BFAR, and the LGUs of the coastal barangays of the 11 bays in Regions 5, 8, Caraga, and BARMM (2016–2021, US\$43.05M budget).

Components:

- 1 Coastal Resource Management
- 2 Livelihood Development

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E
THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Introduction

The **FishCORAL Project** aimed to:

- 1** **Increase household income by 10%** through diversified livelihood sources
- 2** **Reduce poverty** in economically challenged coastal communities

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E
THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Introduction

Implementation of the **FishCORAL Project** in **Eastern Visayas:**

- **4 bays** in Eastern Visayas
- **Yolanda**-affected areas
- **36** cities/municipalities
- **500** barangays

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E
THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Theory of Change

**Livelihood training/
Capability
Development**

(e.g., experts, fisherfolks, LGUs, and project implementers)

Budget/Funds

**Conduct of trainings
and other capacity
building activities**

(Livelihood trainings, workshops, orientations, and meetings)

**Construction of
livelihood
infrastructures** and
acquisition of
equipment

Output

**Trained fisherfolks
and livelihood
projects identified,
and fishing
households **organized
into livelihood groups****

**Livelihood facilities
established** and
equipment installed

**Short-Term
Outcomes**

**Livelihood projects
adopted** per coastal
barangay

**Increased women's
participation** in economic
activities (30% are women
from a baseline of 20%
involved in fishery
enterprises)

**Livelihood facilities and
equipment utilized**

**Final
Outcome**

Fishing households in
the coastal
barangays' annual
income **increased by
10%**

Assumptions:

1. FishCORAL Component 1 was successful
2. Participation and cooperation of Fisherfolks and LGUs.
3. No major shocks (e.g., calamity) affected the growth of the livelihood enterprise.

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E

THE 10TH M&E NETWORK FORUM | 29 Nov 2023

OBJECTIVES AND EVALUATION QUESTION

Objectives

This study aims to:

- 1 Describe the **fishing households** that participated in the livelihood project
- 2 Determine the extent of **women's participation** in livelihood projects
- 3 Estimate the **impact of the livelihood projects** on the income of the fishing households

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E
THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Evaluation Question

“Did the FishCORAL Project (Livelihood Development) increase the annual income of participating fishing households?”

Hypothesis:

HO

The project intervention has no significant effect on the annual income of the fishing households.

HA

The project intervention has a significant effect on the annual income of the fishing households.

Charting the Path Forward through Partnerships in M&E

THE 10TH M&E NETWORK FORUM | 29 Nov 2023

METHODOLOGY

Methodology

Sampling

- Treatment Group: 660
- Control Group: 660

Total: **1,320** fishing households

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E

THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Image source: mapchart.net

Sampling

Treatment Group (Bay)	No. of Samples (Households)
Maqueda-Villareal	155
Matarinao Bay	57
Leyte Gulf	341
Silago-Cabalian	107
TOTAL	660

Control Group (Coastal Area)	No. of Samples (Households)
Biliran	154
Northwest Leyte	169
Northern Samar	337
TOTAL	660

- **25%** of the total cities/municipalities were covered to represent either treatment group (10 out of 36) and control group (9 out of 34)
- **Treatment Group:** the number of samples was **proportionate to the number of household beneficiaries from each city/municipality**
- **Control Group:** the number of samples was **proportionate to the number of households from each city/municipality**
- **1 to 5 barangays** were randomly selected from each city/municipality

THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Methodology

Data Analysis

- Various measures of **descriptive** (center, variation, comparison of means, etc.) and **inferential** statistics were used to describe and infer from the data.
- **Propensity score matching** (using the nearest-neighbour matching algorithm) was used to match the control and treatment groups.
- **Difference-in-Differences** will be used to estimate the net impact on the fishing households' income in the treatment group by using the matched treatment and control units.

Comparison on household incomes

The mean household incomes of the treatment and control groups **showed no significant difference**

	2016 Control (PhP)	2016 Treatment (PhP)	2023 Control (PhP)	2023 Treatment (PhP)
Mean	106,202.02	120,629.78	126,117.51	149,407.55
Std. Deviation	143,923.17	135,086.78	153,961.84	182,973.00
Levene's Test	p=0.198		p=0.239	
T-test	p=0.225		p=0.380	
Mann-Whitney U	p=0.147		p=0.415	

Propensity Score Matching

Standardized Mean Difference and Region of Common Support

A Decade of Collaboration:
Charting the Path Forward through Partnerships in M&E
THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Propensity Score Matching: ATT estimation

The average treatment effect on the treated in terms of annual income is only at **Php 1,035**, not statistically significant at 5% level.

Hence, the project has no impact on the annual income.

Variables	Income	p-value
Treatment	1,305 (22843)	0.955
n	98	
R ²	0.005	

Note: Standard errors in parentheses
***p<0.01, **p<0.05, *p>0.1

Points for consideration: survey insights on the implementation of the FishCORAL project

1. The **pandemic** affected the implementation of the project.
2. **Typhoon Odette** (2021) destroyed most of the FishCORAL Project facilities and equipment in Silago-Cabalian Bay, Southern Leyte (Treatment Group).
3. In some treatment areas (e.g., Silago-Cabalian Bay), facilities/equipment were provided but **no livelihood trainings conducted**.
4. Most beneficiaries in the Maqueda-Villereal Bay (Catbalogan City) had only participated at the start of the project due to **change of Punong Barangays in 2016**.
5. Project monitors **rarely visited** toward the end of the project.

Tentative Conclusions

More fishing households in the treatment group have access to **electricity, improved drinking water sources, and improved sanitation facilities** than in the control group.

No significant difference in the average annual incomes of fishing households between the treatment and control groups.

The project has **no significant impact** on the annual income of the fishing households.

A Decade of Collaboration:

Charting the Path Forward through Partnerships in M&E

THE 10TH M&E NETWORK FORUM | 29 Nov 2023

Provisional policy implications

- Prioritize strategies that **enhance the resilience and long-term sustainability** of the project by integrating adaptive measures (e.g., resilient infrastructure and livelihood practices)
- Thorough **needs assessment** in terms of provision of livelihood interventions (e.g., equipment type)
- **Strengthen monitoring** of projects even beyond the implementation period
